## Manual Handling solutions that work for your business.

CHEETA, POWERED HANDLING SOLUTIONS.

The Cheeta has a unique lifting function that enables one person to handle loads that would normally take 2 or 3 people.

### on & off pallets

### stacking solutions for your business needs

Cheeta is a multifunctional heavy duty powered handtruck which allows you to diversify your business by not relying on the use of forklifts and other large lifting devices which may not always be available on site. Cheeta allows you to go anywhere at anytime giving professional drivers piece of mind when delivering heavy and awkward loads to warehouses, homes, and even construction sites, in fact any location that may not have forklifts or loading docks.

Cheeta reduces Insurance Costs and Workers Compensation Claims through fewer injuries as it does 100% of the lifting for you, decreasing the risk of back injury and property damage.

Cheeta reduces Labour costs - a job that would normally take two or even three men, can now be done by one with the Cheeta powered handtruck.
