

CUMMINS

JetCoin™

Self Service Coin Center

Shown with optional sign and graphics.

Bring more customers into your store!

MADE IN USA

Build Traffic, Add New Revenue!

Cummins JetCoin™ Centers provide an added revenue stream and bring more customers into your store. Self-service coin redemption in the retail environment helps attract and retain customers — and puts cash into their hands to immediately spend in your store!

Potential Revenue Opportunity

You Own the JetCoin™ Center

Any service fees are yours to keep — plus you have the flexibility to charge varying fees to adjust to the market or use as a competitive edge. You can even have different fee percentages for non-customers versus existing customers.

This investment can quickly pay for itself. For example...

Average weekly coin intake\$ 3,500

9% service fee\$ 315

Times 52 weeks/year\$ 16,380

Increased Store Traffic and Customers

The Fastest Sorting Speed in the Industry

JetCoin™ centers boast sorting speeds up to ten times faster than other self-service machines. With greater speed and user-friendly features, the JetCoin center will likely be the preferred coin redemption choice of your customers, resulting in increased visits and word-of-mouth advertising.

Cummins JetCoin™ Centers Provide Benefits For Your Store Operations

In-Store Applications

When switched to attendant mode, your JetCoin can be used to process coins for other in-store needs, such as to recycle coin or balance registers.

Minimal Operator Involvement

Various coin collection options provide sufficient capacity to virtually eliminate interruption of customer transactions and reduce the amount of times your staff attends to the unit.

Industry-Proven Reliability

JetCoin centers use the same JetSort® heavy-duty coin processing mechanism which is used throughout the world in the most demanding applications, including armored car services, casinos and large cash vaults.

Accuracy

JetCoin centers boast a 99.995+% accuracy rating.

Tracking

Includes transaction history records for fourteen days, and a rolling day and week total.

Flexibility

These units fit anywhere... against a wall, in a corner, or built into a customer service counter.

CUMMINS

JetCoin™ Coin Collection Options:

**Sorted Coins
in Bags**

**Mixed Coins
in Bags**

All units can be used with either cloth bags or plastic bags.

**Mixed Coins
in Bins**

Shown with optional graphics.

Bin or Bag?

The decision to use a bin or bag JetCoin center depends upon a number of factors specific to your location. For example, while a bin unit holds the most coin, you would need armored car services that are equipped to handle bins. Your Cummins sales representative can assist you in determining the exact model and options for your needs.

Bin Capacities

Bin machine capacity is approximately 60,000 mixed coins.

Bag Capacities - Sorted Coins

Bag capacities are as follows:

Denomination	Quantity	Weight
.01	5,000	31 lbs
.05	4,000	44 lbs
.10	10,000	50 lbs
.25	4,000	50 lbs
.50	2,000	50 lbs
\$1.00	2,000	33 lbs

Dual bagging is available for pennies and quarters.

Bag Capacities - Mixed Coins

Bag capacities vary by the mix of coins but average 6,000 mixed coins per bag. Unit holds 6 bags.

Reports

Various reports included with the JetCoin provide analysis of the JetCoin center usage as well as operational control. Transaction reports can show real-time daily and weekly totals. Archive transaction reports can be used to assist in machine balancing or settling a customer dispute.

Cummins offers a variety of coin collection systems so you can choose the one that's right for you.

Bin Collection System

Coins are counted by denomination and collected using a single, secure, high-capacity bin system, promoting fewer transaction disruptions.

Bag Collection System

• **Sorted Bag** — Each denomination is counted and sorted into separate bags that require no further processing. Denomination stickers at each bag holder simplify bag management.

• **Mixed Bag** — Coins are counted by denomination and then collected in bags of mixed coins. This system combines the convenience of bags with the higher capacity of bins.

Both bag collection systems come with exact bag stops, bag warning LED lights above bag holder, programmable bag limits and automatic bag clearing.

With all Cummins products, you receive our unsurpassed speed, reliability, and local service network.

JetCoin™ Centers Also Benefit Your Customers

Fast!

Customers appreciate the fastest sorting speed in the industry of 4,000 mixed coins or 6,500 dimes per minute.

Easy!

A touch-screen display guides customers through the simple redemption process.

Reliable!

Robust, proven technology provides outstanding accuracy and reliability, ensuring customer satisfaction and repeat visits.

Convenient!

Your extended operating hours provide your customers the convenience of redeeming their coin when they want, and without waiting in teller lines at their bank.

In short, happier customers translate into loyalty and more shopping in your store.

Optional height adjustable CoinMax sign with cabinet graphics.

Merchandising for your JetCoin

Attention-grabbing CoinMax merchandising items are available to increase awareness and use of the self-service JetCoin center. Colorful machine panel graphics, posters and backlit headers can be added to the JetCoin centers. Buttons, reminder handouts and lane dividers can increase awareness at the checkouts. Outdoor stickers and window clings advertise outside

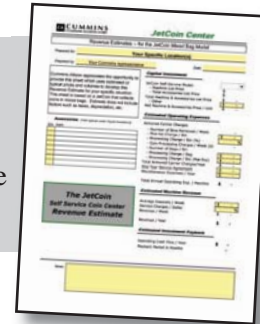

CoinMax™ merchandising items

your store, while floor graphics and easel signs promote inside your store.

Talk to your Cummins representative for help in selecting the CoinMax graphics package that best meets your needs.

Free Revenue Estimate

Based on potential coin volume, local armored carrier costs, and other factors specific to your store(s), this document provides a tailored estimate of the JetCoin's payback and profitability.

Mixed Bag Version: 26" W x 24" D x 52" H

Power: Voltage operating ranges are either 105-130v or 198-253v. Frequency is 60/50Hz. Customer must provide an electrical supply properly grounded and protected by a circuit breaker in accordance with applicable electrical code. This equipment must be plugged into a properly grounded outlet. To obtain the best results, Cummins recommends using this equipment in conjunction with a dedicated AC power line. Power consumption (full load amps) at nominal voltage: 9.0 Amps (120v); 4.5 amps (220v). Power disruptions that result in input voltage other than the power requirements listed can lead to improper operation of this device or result in failure/damage to electrical components. (Power disruptions are not covered under machine warranty or preventative maintenance agreement.) Power conditioning/stabilizing devices are available through Cummins.

LOCAL SERVICE & WARRANTY SUPPORT

Cummins is committed to delivering the highest quality products and services. Warranty and maintenance of Cummins products are handled locally, by factory trained, factory direct employees in over 50 North American cities.
